

# Introduction to Cloud Computing

## LAB 01

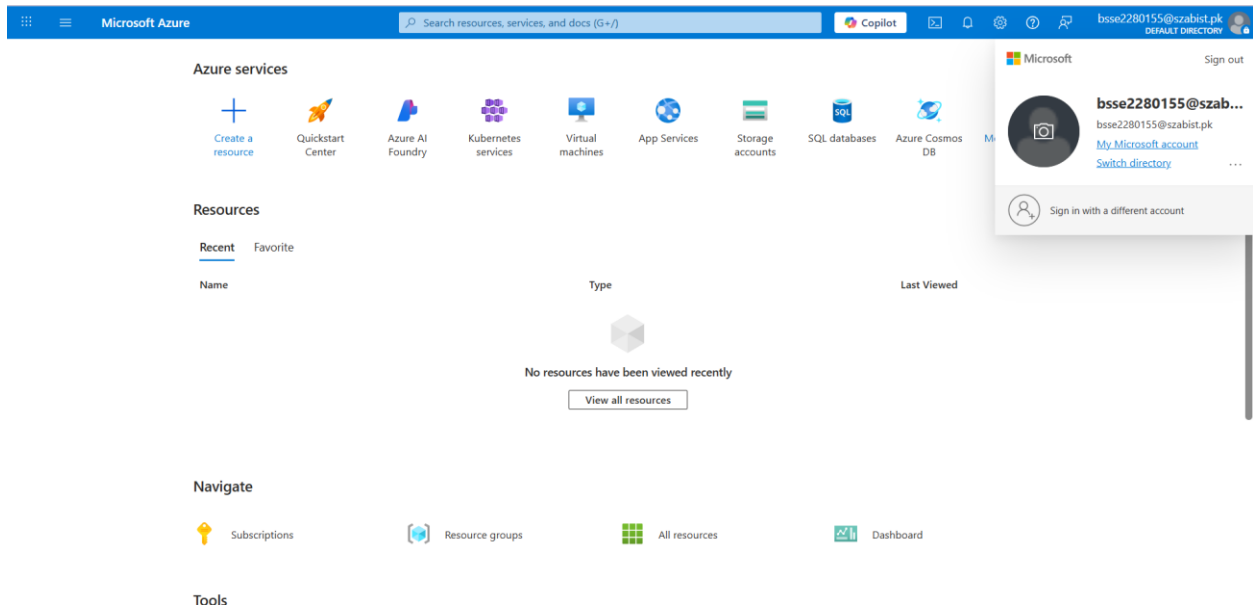

Name: Muhammad Yahya

ID: 2280155

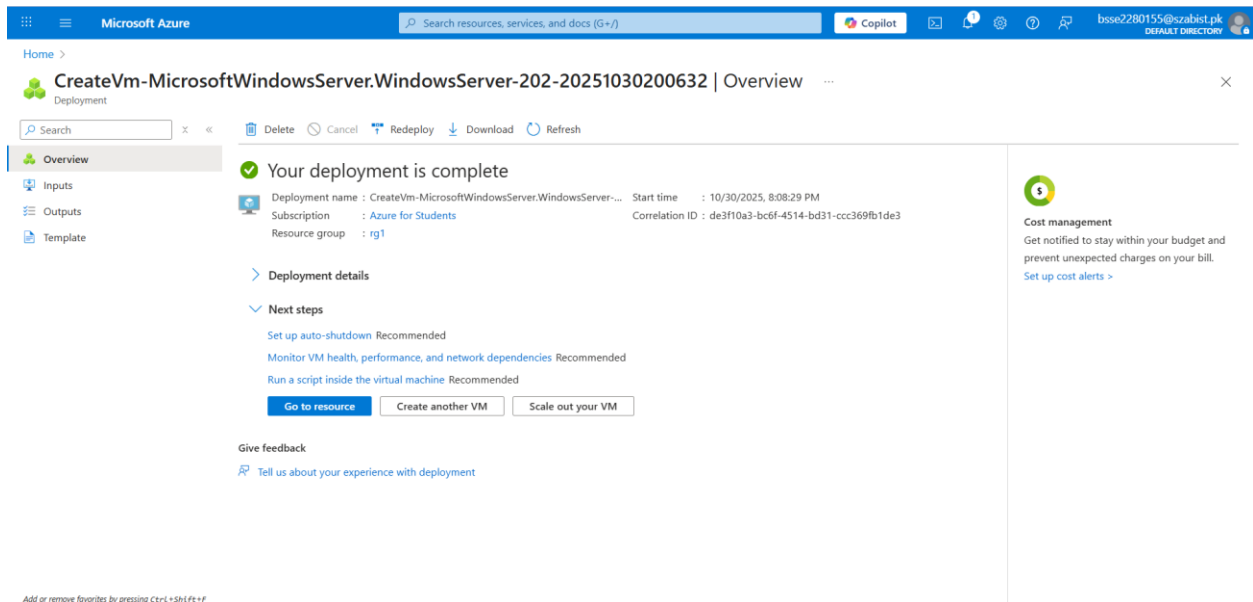

Section: B

### Task 1:

Sign-in to the Azure portal: <https://portal.azure.com>

### Create Virtual Machine:

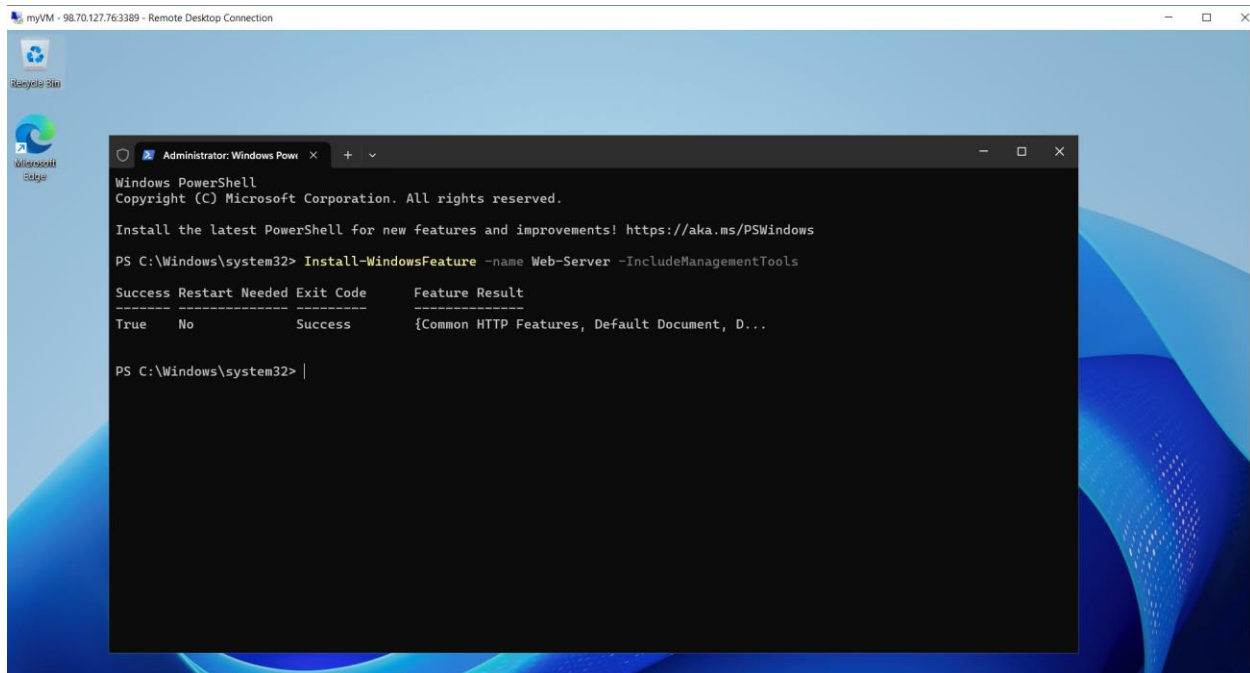

## Task 2:

### Connect to Virtual Machine

The screenshot displays the Microsoft Azure portal interface for connecting to a virtual machine named 'myVM'. The 'Connect' tab is active, showing various connection methods. A Windows Security dialog box is open, titled 'Enter your credentials', which prompts for the password for the 'azureuser' to connect to the IP address 98.70.127.76. The dialog includes a 'Remember me' checkbox and 'OK' and 'Cancel' buttons. Below the dialog, the 'Connect using RDP file' section is visible, featuring a 'Download RDP file' button and a text field for the username 'azureuser'. The background shows the Azure portal navigation pane on the left with options like Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Resource visualizer, and Connect. The 'Connect' section is expanded, showing Bastion, Windows Admin Center, Networking, Settings, Availability + scale, Security, Backup + disaster recovery, Operations, and Monitoring. The 'More ways to connect (4)' link is also visible.

### Task 3:

#### Install the Web Server

The default IIS Web Server welcome page is displayed.
